PROFILE

I love what I do and I think is the main thing!

Due to the fact that I love my job, I try to do everything as perfectly as possible.

EDUCATION

Bachelor, Tashkent University of Information Technologies

Tashkent

Sep 2019 - Present

At the moment I'm studying at the Tashkent University of Information Technologies at the Telecommunications faculty. I study in the correspondence branch, so I have a lot of free time to work.

EMPLOYMENT HISTORY

VueJS developer

Tashkent

April 2022 - Present

Bulavka.uz

Bulavka.uz - one of the major online marketplaces in Uzbekistan. In this company, I hold the position of a mid/senior Frontend developer. In this company I keep the website up and running, implement new features, fix bugs. I am also doing development on the admin panel and business cabinet for product suppliers. So far I have refactored a lot of code and optimized the business cabinet and admin panel.

Frontend developer

Tashkent

May 2021 - April 2022

Kirano

Kirano - one of the leading web studios in Tashkent. Here I was engaged in layout of sites of different levels of complexity (online stores, corporate sites, landing pages, etc.). I optimized sites for faster loading, so that the user could see the web page faster and interact with it, as well as for Google Page Speed Insights.

HTML layout designer, Webtuning

Tashkent

Feb 2021 - May 2021

Webtuning

I worked as HTML layout designer at Webtuning, a company engaged in the developing websites of any complexity, for some reason the development team fell apart.

In this company, I gained experience in using the following technologies / skills: using the BEM methodology, using the Bootstrap, increasing the speed of loading a web page (Google Page Speed), coding the web page so that the web page matches the design layout.
